

Pole Top Rescue Kit - Linq

Linq's Pole Top Rescue Kit is designed to perform pole top rescue on a victim suspended from their work position.

Key Features:

- 4:1 pulley system provides reduced effort on the rescuer. Every 100kg of mass only requires 25kg of effort.
- RES-Q Kit comes pre-assembled. No hassle with assembly of pulley and rope.
- Static kernmantle rope comes with I.D trace as per AS/NZS 4142 requirement for traceability. Min break load of 35kN providing enhanced strength.
- Raise and lower casualty makes the RES-Q Kit versatile.
- Back up braking mechanism comes standard. This can be engaged by the rescuer or setup to brake automatically.
- Comes with two (2) tie offs to allow for mounting of the RES-Q Kit and to also utilise the braking mechanism as standalone device without being attached to the rescuer.
- Heavy duty bag c/w shoulder straps and the convenience of a stowage area for the rescue pole.
- Standard RES-Q kit supplied with 50 meters of rope.
- Custom rope lengths available - 80m, 100m and 150m
