

## 20L Cooler - Sqwincher

Sqwincher's 20L Cooler is the perfect way to keep your drinks cool during the day whilst on the jobsite or physical activity. Easily add a Sqwincher's 2L Electrolyte Liquid Concentrate bottle to the cooler and fill the rest with water for perfect mixing. This cooler will guarantee you stay hydrated and refreshed whilst working to reduce the risks of dehydration and fatigue.

A significant proportion of Australians experience chronic dehydration, with over half of heavy industry workers already dehydrated before starting their shift. When we sweat, both water and electrolytes are lost, and if not adequately replenished, this can impair focus, mood, and short-term memory, potentially leading to a heightened risk of injury.

### Key Features:

- Keeps fluid cold for up to 12 hours
- Bright safety yellow so hydration is always visible
- Keeps cold when close to where the hot work is performed
- Strong rust proof plastic
- BPA free
