

Electrolyte Hydration Sugar Free Powder Qwik Stiks - Sqwincher

Enjoy the same great taste you expect from Sqwincher. Single-serve Electrolyte Hydration Sugar Free Powder Qwik Stiks are designed to be poured directly into 600ml bottled water. Just pour, shake and drink. Zero Sugar Calories Sqwincher's electrolyte replacement formula was designed for the high heat stress environments of industry. Sqwincher is absorbed into the body significantly faster than water alone, allowing the body to replenish the electrolytes and minerals needed for rehydration. Plus, Sqwincher contains nearly twice the Potassium and half the Sodium compared to other sports drinks used in industry, and it tastes better.

A significant proportion of Australians experience chronic dehydration, with over half of heavy industry workers already dehydrated before starting their shift. When we sweat, both water and electrolytes are lost, and if not adequately replenished, this can impair focus, mood, and short-term memory, potentially leading to a heightened risk of injury.

When serving Electrolyte Hydration Sugar Free Powder Qwik Stiks, pour contents of the sachet into 500-600ml drink bottle, fill with water and shake well.
