

Portable Key Box - Volt Safety

Volt's Portable Key Box allows multiple workers to work onsite, without compromising safety on-site. After the equipment to be worked on has been isolated from the energy source, the lockout keys can be placed inside the Portable Key Box.

Workers can place their unique padlock on the Key Box and can come and go to remove their padlock, but the Key box can not be opened until the last worker has removed their padlock.

If you have additional or varied requirements, please ask about our other Lockout options!

Key Features:

- Colour: Red
- Size: 208mm x 98mm x 99mm
