

Reinforced Aluminised Foundry Overboots - Elliotts

Elliotts Reinforced Aluminised Foundry Overboots are made from Aluminised Preox PR720. The T-Gard P190 Thermal Liner has been specifically designed for Furnace PPE. They are softer and more flexible, which grants the wearer a more comfortable fit and better movement. These Reinforced Aluminised Foundry Overboots are designed to be worn over safety boots and to protect the feet and ankles from high radiant heat, sparks, and slag.

Key Features:

- Material: PR720 - Aluminised Preox (Pro-oxidised acrylic) and T-Gard P190 - 1150 gsm
- Utilising heavy-duty Aluminised Preox PR720
- Fully lined with T-Gard P190 Thermal Liner
- Heat-resistant rubber soles with insulating sole inserts for additional heat protection
- Hoop + loop adjustable closure strap
- Soft and flexible for a comfortable fit and better movement

Standards:

- ISO 11612
