

Electrolyte Freezer Pops Mixed Flavours - Sqwincher

Sqwincher's Electrolyte Freezer Pops provide electrolytes for your body and also helps to cool down your core body temperature fast with its frozen format. These electrolyte pops go beyond flavoured sugar water treats or brands. Sqwincher Sqweeze Electrolyte Freezer Pops are a fun way to cool you down while replenishing essential electrolytes. Regardless of the lifestyle, everyone needs hydration and no two individuals are alike. Water alone can't put back the necessary electrolytes the body needs when rehydrating. When you need quick hydration on the job, reach for the unique frozen solution designed to help you replace what the body sweats out.

A significant proportion of Australians experience chronic dehydration, with over half of heavy industry workers already dehydrated before starting their shift. When we sweat, both water and electrolytes are lost, and if not adequately replenished, this can impair focus, mood, and short-term memory, potentially leading to a heightened risk of injury.

When serving, place Freezer Pops in freezer, once frozen simply tear across the line to enjoy.
