

## Static Line – Ferno

The Ferno Static line with double action hook is manufactured from 11mm static rope and has a thimbled eye sewn in one end. The sewn eye eliminates the need to tie knots to attach the rope lines to anchors. They are typically used as rescue ropes or configured with a Type 1 fall arrest device as a vertical drop line but can be used in a variety of applications.

### Key Features:

- Sizes: 5m, 10m, 15m, 20m, 25m, 30m, 50m
- 11mm diameter rope
- A steel double action hook is sewn into the termination of the rope lanyard
