

Phase Indicator 8031 – Kyoritsu

The Kyoritsu Phase Indicator 8031 (CE Type) is a compact and reliable phase sequence indicator designed to detect the phase order and check for open phases in three-phase power systems. Featuring non-contact voltage detection and clear LED indicators, it ensures quick and safe verification of phase rotation in electrical installations. Ideal for electricians and maintenance professionals.

Key Features:

- Dimensions: 106mm x 75mm x 40mm
- Weight: Approx. 350g (Main Unit Only)
- Operational Voltage: 110 to 600V AC (50/60Hz)
- Measuring frequency range: 45 to 66Hz
- Small, Lightweight and portable
- Designed for ease of operation and ruggedness
- Sealed against dust to ensure trouble-free performance
- Includes:
 - Carrying Case
 - Alligator Clips
 - Test Probes
 - Instruction manual

Standards:

- IEC 61010-1
- CAT III 600V
- CAT IV 300V
- Pollution degree 2
